

110 230V AC Lithium Battery System

What is a lithium battery energy storage system (BESS)?

The Sol-Ark[®] L3 Series Lithium(TM) battery energy storage system (BESS) offers scalability, reliability, and energy resilience essential for modern commercial and industrial operations. It's a future-proof battery technology solution for today and tomorrow.

Where are Lithos batteries made?

Made in California. Built Purpose Tough. Exceptional Battery Technology from World-Class Engineers. In nearly a decade of lithium-ion battery technology innovation, Lithos has established itself as the global leader in high performance battery systems engineered for demanding use.

How heavy is a Franklin Home Power Battery?

At 408 pounds, a 13.6 kWh aPower battery is significantly heavier than comparable models. For example, at 359 pounds, LG's 14.4 kWh HBC battery is over 50 pounds lighter. It's also notable that 13.6 kWh is the only battery size offered in the Franklin Home Power system, so it's tough to build the system to a precise size. Quick facts: What we like:

Can a lithium battery be used with a lead acid system?

We use our many years of expertise to develop powerful and reliable battery systems. Our LE300 is the first lithium battery that can be used in hybrid with lead acid systems, without any changes to the charge controller. The patented hybrid technology brings a number of never seen advantages.

What temperature can a battery be discharged at?

Device has an integrated heating that is active between -20[°]C and 10[°]C cell temp. Discharge possible between -20[°]C and 60[°]C cell temp. At cell temp. below -20[°]C and over 60[°]C system is running in pure lead acid mode for higher battery lifetime.

What makes Lithos a good battery system?

Get built-in confidence with Lithos inside. The high voltage lithium-ion battery system engineered for use in demanding environments. Superior battery systems that combine modular customization with high-volume production. Made in California. Built Purpose Tough. Exceptional Battery Technology from World-Class Engineers.

The Sol-Ark[®] L3 Series Lithium(TM) battery energy storage system (BESS) offers scalability, reliability, and energy resilience essential for modern commercial and industrial operations. It's a future-proof battery technology solution for today ...

The EVERVOLT[®] home battery system integrates a powerful lithium iron phosphate battery and hybrid inverter with your solar panels, generator and the utility grid to provide your own personal energy store.
