

182-N-Type 10BB Mono TOPCon Bifacial Solar Cell Ronma Solar

What is Topcon bifacial solar panel?

TOPCON (tunnel oxide passivated contact) technology boost N type solar cell efficiency up to 24.5%. 24.5% efficiency 182mm TOPCon solar cell is with rated power 8.08Watt. Bifacial solar panel made up of bifacial solar cells can generate 30% more power compared with monofacial solar panel. ?Process flow? ?Key features?

What is the difference between bifacial and n type solar cells?

TOPCON (tunnel oxide passivated contact) technology boosts N type solar cell efficiency up to 24.5%. Monocrystalline N type 182mm TOPCon solar cell is with rated power 8.08Watt at 24.5% efficiency. Bifacial solar panel made up of bifacial solar cells can generate 30% more power compared with monofacial solar panel. ?Product description?

What is the difference between bifacial and monocrystalline n type solar cells?

Monocrystalline N type 182mm TOPCon solar cell is with rated power 8.08Watt at 24.5% efficiency. Bifacial solar panel made up of bifacial solar cells can generate 30% more power compared with monofacial solar panel. ?Product description? TOPCON (tunnel oxide passivated contact) technology boost N type solar cell efficiency up to 24.5%.

How efficient are Topcon solar cells?

Due to the potential for high theoretical limit efficiency as high as 28.7% and low cost, TOPCon solar cells have become one of the prospective technologies in the photovoltaic (PV) market. At present, the highest efficiency for n-TOPCon has achieved 26.4% on an area of 330.15 cm² at JinkoSolar.

How to improve conversion efficiency of N-Topcon solar cells?

Improving the conversion efficiency of n-TOPCon solar cell is still a hot topic. The selective poly-Si based passivating contacts (Poly-SEs) are ideal candidates for reducing the parasitic absorption and contact resistivity of n-type silicon solar cells and for providing better current collection.

What is the SiO_x/n⁺-poly-Si process of N-Topcon solar cells?

Therefore, this study focuses on the SiO_x/n⁺-poly-Si process of n-TOPCon solar cells, which consisted of screen-printed metallic contact on both sides fabricated from 182 mm × 182 mm × 0.14 mm Cz-Si wafers through an industrial-type process with the fixed Ag/Al and Ag pastes.
