

Energy and climate-related policies have been accelerated by both state and federal governments, and for many companies the time feels right to invest in energy storage. This event gathers together investors, developers, IPPs, grid operators, policymakers, utilities, energy buyers, service providers, consultancies and technology providers under one roof.

In its draft national electricity plan, released in September 2022, India has included ambitious targets for the development of battery energy storage. In March 2023, the European Commission published a series of recommendations on policy actions to support greater deployment of electricity storage in the European Union .

The country has vowed to realize the full market-oriented development of new energy storage by 2030, as part of efforts to boost renewable power consumption while ensuring stable operation of the electric grid system, a statement released by the National Development ...

The Union Minister for Power and New & Renewable Energy has informed that the Government has issued "National Framework for Promoting Energy Storage Systems" in August 2023 for the development and deployment of Energy Storage Systems to facilitate energy transition in the country.. As per the updated Nationally Determined Contributions (NDCs) ...

5. Existing Policy framework for promotion of Energy Storage Systems 3 5.1 Legal Status to ESS 4 5.2 Energy Storage Obligation 4 5.3 Waiver of Inter State Transmission System Charges 4 5.4 Rules for replacement of Diesel Generator (DG) sets with RE/Storage 5 5.5 Guidelines for Procurement and Utilization of Battery Energy Storage

WASHINGTON, D.C. -- In support of the Biden-Harris Administration's Investing in America agenda, today the U.S. Department of Energy (DOE) announced nearly \$2 billion for 38 projects that will protect the U.S. power grid against growing threats of extreme weather, lower costs for communities, and increase grid capacity to meet load growth ...

Following the 2021 "Opinion" policy release, storage battery sales reached a record high of 48GWh in 2021, which is 2.6 times the 2020 amount. Investment interest in advanced energy storage technologies, including flywheel, salt-carven compressed air, electrolysis power-to-gas, and vanadium flow battery, is still soaring.
