

48V 150AH LiFePO4 Battery Puyang Solar

What is the operating temperature of a 48V 150ah battery?

Operating temperature: Charge at 0~50°C; Discharge at -25~60°C. More Advantages: The 48V 150Ah batteries support recharging by solar power, wall outlet and generator. It can maximize the use of solar energy to save your electricity costs, get power immediately during a power outage and reduce carbon footprint.

How long does a LiFePO4 battery last?

6000+ deep cycles & 80% DOD. Our LiFePO4 battery provides more than 6000 deep cycles compared to traditional lead-acid batteries only about 300-600 cycles, which extends the battery lifespan more than 10 times. 6000+ deep cycles using life and 80% depth of discharge are also better than many LiFePO4 battery of other brands.

What is Puyang Solar?

PUYANG SOLAR, established in 2018, is a high-tech enterprise that specializes in the R&D, production, and sales of solar charge controllers and Lithium (LiFePO4) batteries. We have factories for solar charge controllers (150,000 square meters) and Lithium (LiFePO4) batteries (270,000 square meters), both located in Dongguan city, Guangdong Province.

Does cloudenergy LiFePO4 battery have a built-in BMS?

Built-in BMS: Cloudenergy LiFePO4 battery has a built-in BMS. High temperature resistance can reach 75°C. The built-in high temperature cut-off function prevents charging at temperatures above 75°C. Can prevent short circuit, over charge, over discharge, over current. Operating temperature: Charge at 0~50°C; Discharge at -25~60°C.
