Are snadi / SNAT inverters elongated?

I thought I would make a post about my new Foshan SNADI / SNAT all in one. Looking at inverters, the options are high frequency and low frequency, and of the low frequency they tend to be either elongated or rectangular, with or without an solar charger. Just out of curiosity, have you measured the idle loss?

Can I use an external battery with the snadi inverter/charger/MPPT?

The All-in-one includes terminals for an external battery lugs. With the battery (safety) switch in the off position only the external battery is used, hence you can use a different capacity 48V external battery with the Snadi Inverter/charger/MPPT. Thanks for sharing your project - i'm keen to follow the long term performance.

Why should you choose snadi?
