ENGIE UK is committed to expanding its renewable energy portfolio, aiming for 50GW of installed capacity by 2025 and 80GW by 2030. The company employs 1,000 people in the UK, working towards net zero carbon by operating low carbon infrastructure and helping businesses reduce energy consumption.

So, reducing energy consumption can inevitably help to reduce emissions. However, some energy consumption is essential to human wellbeing and rising living standards. Energy intensity can therefore be a useful metric to monitor. Energy intensity measures the amount of energy consumed per unit of gross domestic product.
