

# Air liquide carbon reduction energy storage

Air Liquide China, Shenergy and SCIP Investment Co. jointly signed an investment agreement with Shanghai Chemical Industry Park (SCIP) on March 1, 2022, in Shanghai, China to establish a joint venture in the industrial park. This three-party joint venture aims to build the largest-scale hydrogen filling center in Shanghai and to accelerate the ...

Paris, May 17, 2022 - Pertamina and Air Liquide Indonesia agreed to collaborate in developing Carbon Capture and Utilization (CCU) technology at the Balikpapan Refinery Processing Unit. It is a form of Pertamina's commitment to implementing Environmental, Social, and Governance (ESG) aspects and supporting Greenhouse Gas (GHG) emissions reduction.

Shanghai Chemical Industry Park Industrial Gases Co., Ltd (SCIPIG), a subsidiary of Air Liquide, will invest more than 200 million euros to build two hydrogen production units and related infrastructure in Shanghai Chemical Industry Park (SCIP). These units will bring significant environmental benefits, as they are designed to replace current supply from a third ...

HOUSTON, Texas - Three additional companies have announced their support for exploring the implementation of large-scale carbon capture and storage (CCS) technology in and around the Houston industrial area. Air Liquide, BASF and Shell are joining Calpine, Chevron, Dow, ExxonMobil, INEOS, Linde, LyondellBasell, Marathon Petroleum, NRG Energy, Phillips ...

One of the world's greatest challenges is to develop renewable energies, moving away from a high reliance on fossil fuels. This future shift in the energy mix will require large-scale electrical energy storage solutions. The energy transition is at the heart of ...

Air Liquide, a world leader in gases, technologies and services for Industry and Health, and ENEOS Corporation, Japan's leading energy company, have signed a Memorandum of Understanding (MoU) to collaborate on accelerating the development of low-carbon hydrogen in Japan and contribute to the energy transition.

Energy Observer's partnership with Air Liquide, which is committed to developing hydrogen mobility, was a natural choice. Initially signed in 2017, the partnership was further strengthened in 2021 when Air Liquide became Energy Observer's main partner. The objective was to bring together wide-ranging expertise to accelerate the energy transition and raise ...
