

Coupling solar energy and storage technologies is one such case. The reason: Solar energy is not always produced at the time energy is needed most. ... Sometimes energy storage is co-located with, or placed next to, a solar energy system, and sometimes the storage system stands alone, but in either configuration, it can help more effectively ...

"This large-scale ESS marks the achievement of Singapore's 200MWh energy storage target ahead of time. It will complement our efforts to maximise solar adoption by storing and delivering energy given the intermittent nature of solar power," said EMA Chief Executive Ngiam Shih Chun.
