

Ballast System Hopergy

What is hopergy east west mounting system?

Hopergy East West Mounting System provides more stable and more consistent power throughout the day relative to south facing designs. It reduces the peak production spike at noon and widens the power duration into the morning and evening. The system is fully constructed from aluminum and designed specially to accommodate mainstream solar modules.

Who is hopergy?

Powered by innovative capability since its foundation, Hopergy focuses on researching, manufacturing, distribution and engineering of solar photovoltaic mounting products. Our solar PV solutions address the immediate requirements and needs of residential, corporate, government and utility scale applications worldwide.

Can a ballast Mount be used on a flat roof?

Hopergy's Ballast Mounting Solution is suitable for almost any flat roof. The system's rigidity and linked rail design can withstand conditions in the high wind, snow and seismic zones and its aluminum and stainless steel components can endure even the most corrosive environments.

Why should you choose hopergy?

customers. Hopergy is also partnering with a selected number of competent distributors and system integrators worldwide to explore and support the solar industry and most importantly to do our part in making this world a cleaner and safer place for future generations. Hopergy's Tin (Metal) Roof Mounting Solution is suitable for almost any

What are hopergy mounting brackets?

the market. Hopergy's wide range of mounting brackets provide for fast and secure fixing to sheet metal, purlins or rafters and for different roofing types at angles from 1° to 60°. To simplify connection of support rails to brackets, Hopergy's rails are designed to allow fixing nuts to be simply swivelled into
