

# Blue Pack Industrial Power Battery Natron Energy

What is a natron blue pack battery?

The Natron Blue Pack battery is a 25kW, 48 volt building block for systems up to 812 volts. Standard configurations are 10-string for 480 volt critical power applications and 14-string configuration for 672 volt industrial applications.

What is a blue pack battery?

**BLUE PACK CRITICAL POWER BATTERY** Introducing the Industry's Highest Power, Longest Life, Safest Battery High Power Max Sustained Power per Energy (W/Wh) 40/1 10/1 7/1 Lead Acid Li- ION Natron Long Life Deep Discharge Cycle Life > 50 k < 10 k < 1 k Lead Acid Li- ION Natron Safe and Fault Tolerant No Fire or Explosion During Heating Overcharge

What is a bluepack critical power battery?

Made with Natron's revolutionary chemistry, the BluePack(TM) Critical Power Battery uses breakthrough sodium-ion cells based on Prussian blue electrodes to deliver: 100-0-100% SOC repeatedly with no wait, settling, or rest periods UL listed and independent safety study confirmed Transforming Power One Industry at a Time.

Where can I buy a natron blue rack battery?

Natron will display this new battery at 7x24 Exchange in San Antonio, Texas, Oct. 23-26. Pre-orders will be accepted at Natron's display at Booth #15. Pre-production units shipping in early 2023. For more information about the Blue Rack and sodium-ion battery technology, visit [natron.energy](http://natron.energy).

Does Natron Energy use blue electrodes?

Turning Chemistry into Currents. Unlike other sodium-ion battery options, Natron Energy's unique sodium-ion cell uses Prussian blue electrodes to create a safer, more powerful battery that operates at an extremely wide temperature range. Build America. Buy America.

Who are Natron batteries?

Industrial and grid storage customers. Today, Natron is a world leader in sodium-ion batteries and the first company to commercialize Prussian blue electrodes. Natron works with established pigment producers and Li-ion cell OEMs to deliver quality products via massively
