

What is Brazil's largest battery storage project?

Further details about Brazil's largest battery storage project to date have been revealed including its integrators and equipment providers. The inauguration of the 30MW/60MWh system took place last year, on the networks of transmission system operator (TSO) ISO CTEEP, as reported by Energy-Storage.news in November.

Will Brazilian batteries compete in energy auctions in 2024?

Our Standards: The Thomson Reuters Trust Principles. The Brazilian government plans to include batteries and other forms of energy storage to compete in energy auctions which are set to happen in the first half of 2024, an official from the Mines and Energy Ministry told Reuters.

Should Brazil use batteries to power its electricity grid?

Operating Brazil's electricity grid has become more complex, requiring more flexibility, as energy sources with a variable output - such as wind and solar - have gained space in the country's matrix. The batteries would help counterbalance the variability of renewable generation stepping in when output from renewable sources is lower.

How can Brazil expand the share of renewable sources?

"One way to expand the share of renewable sources in Brazil's power generation mix is by giving them greater predictability. A non-dispatchable, non-predictable renewable source, when combined with a storage system, becomes dispatchable, that is, more widely used by the national system operator.

Further details about Brazil's largest battery storage project to date have been revealed including its integrators and equipment providers. The inauguration of the 30MW/60MWh system took place last year, on the networks of transmission system operator (TSO) ISO CTEEP, as reported by Energy-Storage.news in November.

Brazil is taking its first steps toward its ambitions of bringing storage into the energy transition of its electricity sector. The modernization of the electricity sector discussed under the legislative power combined with current initiatives of the regulatory and planning bodies to advance knowledge and regulation in this matter is paving the way for storage to play a role ...

2GW Ontario storage procurement. Following the province's largest ever energy storage procurement, the IESO is launching a second procurement (LT2 RFP) which the system operator will split into three different streams to secure capacity and energy into the ...

Opening of a distribution system-connected battery storage system in Delhi, India. Image: Tata Power DDL. New guidelines for procurement and utilisation of battery energy storage systems (BESS) as assets for

generation, transmission and distribution and ancillary services have been published by India's Ministry of Power.

Seasoned renewable energy lawyer Adam Walters from Stoel Rives argues that procurement in the battery storage space is currently like a sort of Wild West. Here, Walters describes to Energy-Storage.news editor Andy Colthorpe some of the finance risks that face this maturing industry around procurement issues.

"We're proud of SRP's many lithium-ion battery storage projects coming online, and with the significant growth in our service territory, it is important we continue to pilot new types of energy storage technologies," Hunter said. SRP's RFP details can be found on the company's site. Those intending to respond need to notify the ...

Clean Horizon, an energy storage consultancy that supports developers and investors in the procurement of energy storage solutions, shares views on the current trends in equipment prices and technological advances observed, as well as on the procurement strategies that can be applied in order to achieve lowest costs with acceptable performances and ...
