

The principle of capacitor energy storage welding is to use the energy slowly stored in the capacitor from the power grid. In a short period of time, the metal is heated and melted by discharging the welded workpiece through the resistance welding transformer. Compared with other welding methods such as AC machines, the instantaneous power ...

This spot welder, unlike many available DIY projects, doesn't need a microcontroller to work: the welding pulse is triggered using relay module and a timing capacitor. Welding current is switched with an old recycled industrial thyristor module. Pulse energy can be adjusted with a potentiometer, which changes the voltage of capacitor bank.

SUNKKO A330 Series Gantry-style Pneumatic Battery Spot Welder Capacitor Energy Storage Pulse Welding Machine. \$549.99 - \$1,099.99. Quick view Choose Options. Quick view Add to Cart. GLITTER. GLITTER 801D Battery Spot Welder Capacitor Energy Storage Pulse Welding Machine \$149.99. Quick view Add to ...

GLITTER 801H Battery Spot Welder Capacitor Energy Storage Pulse Welding Machine. Rating * Name Review Subject * Comments * \$209.99 - \$249.99) SKU: JFBSW00015. UPC: 888107102960. Condition: New. Availability: Usually ships in 1 business days. Ship From: China Warehouse. Shipping Cost: Order Checkout Calculating * Current Stock: ...

Professional & Powerful: Utilizing super energy-gathered pulse welding technology, this capacitor energy storage pulse spot welder achieves 14.5KW powerful pulse output and 290J peak welding energy, ensuring efficient and reliable welding effect, thereby enhancing the performance of capacitor batteries

The new-designed capacitor energy storage welder uses the latest energy-gathered pulse technology, is has great welding power,the soldered dot is uniform and beautiful, no blackening. 3. The maximum output of the 801B welder is 11.6 kilowatts. It can be used for large batteries welding. 4. The new operation interface allows you to adjust the ...

Heltec SW01 series spot welding machines are capacitor storage welding machines. They're high power spot welders with max peak pulse power of 21KW. You can select the peak current from 2000A, 2500A to 3500A. It is easier for you to use the correct spot welding mode with the dual-mode function key on them.
