

CBG 1500-2 Canbat

What is CANBAT battery?

Developed in Canada by Canbat using state of the art technologies for long-life return on investment. Our catalyst flat plate gel technology recombines hydrogen and oxygen gases during the charging process, which enhances the battery's safety and makes it more resistant to higher temperatures.

What is a CBG battery?

CBG is our range of deep cycle gel batteries designed for cyclical applications which require a long-lasting battery, such as the following: Gel batteries are designed for deep cycle applications that require deep discharges on a regular basis. Gel batteries have a longer cycle life compared to all AGM batteries.

What does CANBAT stand for?

Our Canbat brand name is an abbreviation which comes from Canadian batteries. 1. General Purpose 2. Deep Cycle 3.
