

How does Cairo's new metro project help reduce air pollution?

According to JICA, the project aims to meet transportation demand and mitigate traffic congestion. It also aims to improve air pollution in the Greater Cairo Area by constructing a new metro in the southwest of Greater Cairo and in the city centre of Cairo.

How will Cairo's Transportation project help reduce traffic congestion?

"The funds will be used to help the government's efforts to encourage sustainable urban mobility and create transportation systems that can ease traffic in Cairo," the ministry stressed. According to JICA, the project aims to meet transportation demand and mitigate traffic congestion.

Does Cairo have a Green River?

A restored ancient Egyptian obelisk of King Ramses II is on display outside the new capital library building (right) and the opera house (left). The city promises more green space than Cairo and landscaping has begun on the so-called "Green River," a series of parks and waterways amidst the city's recreational zones.

In terms of application scenarios, independent energy storage and shared energy storage installations account for 45.3 percent, energy storage installations paired with new energy projects account for 42.8 percent, and other application scenarios account for 11.9 percent. The installed capacity of renewable energy has achieved fresh breakthroughs.

About one-third of the primary energy in the world is consumed by buildings. A large amount of CO₂ emission due to building energy consumption has threatened the sustainable development of the world. Improvement on the building energy performance, especially by integration with renewable energy resources has attracted interest worldwide to ...

The Japan International Cooperation Agency (JICA) has granted Egypt \$306m in funding for the implementation of the first phase of Line 4 of the Cairo Metro. This was announced by the Egyptian Ministry of International Cooperation.
