

Cellyte ETGB series Gel SEC Industrial Battery

What is a cellyte 12 volt etgb gel?

The CELLYTE 12volt ETGB Gel Series is the latest addition to our renewables range. It's a German DIN standard OPzV monoblock offering ultra-long life, deep cycling capability and a negligible rate of self-discharge.

What is cellyte TSG?

The Cellyte TSG is a premium Gel range, custom designed for all applications where deep daily discharges are required. The first-choice product for extreme renewable energy and semi-traction markets featuring true gel, SEC CatVent technology and thick high tin plates.

What is cellyte TLG?

The Cellyte TLG range is a rugged design that uses gel technology combined with thick lead calcium grids. Perfect for deep cycle applications including renewable energy, golf carts, mobility, marine and semi-traction, where a tough, no-nonsense battery is required.

What is cellyte FTG?

The CELLYTE FTG range uses true gel technology combined with VRLA principles to give a front terminal range with excellent deep cycle capability. The result is a robust product that is ideally suited to hybrid telecom applications and areas with poor grid reliability.

What is etgb & how does it work?

The ETGB allows minimum gas escape during standard charge, these units are explosion proof without external ventilation. This increased safety is ideal in Solar, Telecommunications, Control Systems, UPS and many more critical applications. The 12volt ETGB Gel Series is the latest addition to our renewables range.

What is the performance efficiency of cellyte TSG?

A performance efficiency of up to 16.6% combined with low whole system costs, give you an excellent price to performance ratio, and a fast return on investment. The Cellyte TSG is a premium Gel range, custom designed for all applications where deep daily discharges are required.
