

# China gravity energy storage

Which energy storage project is under construction in China?

Another Energy Vault gravity energy storage project under construction in Zhangye City, Gansu Province, China. Image: Business Wire. Energy Vault has connected its first commercial EVx gravity-based energy storage system to the grid in China, while construction has been launched on three others, all-in-all totalling 468MWh of capacity.

Will China Tianying build a 100 MWh gravity energy storage project?

A subsidiary company of China Tianying recently announced it formed an agreement with the People's Government of Huailai County to build an additional 100 MWh gravity energy storage project. Energy Vault said it will provide more details on this expansion during the company's second quarter 2023 earnings conference call scheduled for Aug. 8, 2023.

Does Energy Vault have EVx projects in China?

Energy Vault's latest announcement coincides with reports of new EVx projects it is working on with its partners, CNTY and Atlas Renewable Energy. Construction began on a 17MW/68MWh EVx GESS deployment in China last year, alongside two previously announced projects in the country: a 50MW/200MWh EVx and a 25 MW/100 MWh EVx.

"While this represents a significant milestone, our work in China is just beginning given recent local announcements of multi-GW hours of gravity energy storage buildouts, including projects announced in 2022 supporting China's "Zero-carbon parks" initiative with Energy Vault's gravity energy storage technology."

duration. These energy storage durations are expected to increase over time as more renewable energy generation becomes a larger percentage of grid power. "I am pleased to see the increased market adoption of Energy Vault's gravity energy storage technology in China, the world's largest energy storage market supported by the new project ...

China has become a testing ground for Energy Vault, which was founded in 2017 and listed on the New York Stock Exchange last year. The company, now valued at \$345 million, brokered an initial licensing agreement in 2022 with China Tianying, a Shenzhen-listed Chinese waste management firm, to deploy Energy Vault's gravity storage system in Jiangsu ...

As a testament to the growing adoption of Energy Vault's gravity energy storage technology within the China state energy policy framework, the Rudong and Zhangye City EVx systems were recently selected and announced formally last month in January 2024 as part of a list of projects with the classification of "new energy storage pilot ...

Energy Vault has connected its 25 MW/100 MWh EVx gravity-energy storage system (GESS) in China. Once

## China gravity energy storage

provincial and state approvals are obtained to start operating, it will become the world's first commercial, utility-scale, non-pumped hydro GESS. Meanwhile, its partners China Tianying (CNTY) and Atlas Renewable Energy have begun construction on ...

The construction site of Energy Vault's first EVx system in Rudong, China. Image: Energy Vault. Gravitricity has partnered with firms in the US and Germany to deploy its gravity energy storage solution while Energy Vault has provided an update on its China project.

Energy Vault announced the successful testing and commissioning of the Rudong EVx gravity energy storage system (GESS) by China Tianying Co. (CNTY). Testing included the successful charging and discharging of units of the 25 MW/100 MWh GESS invested in and built by CNTY in partnership with Energy Vault and Atlas Renewable.
