Understanding dilution. Although convertible securities solve a funding problem, many existing shareholders dislike them because they cause dilution, that is, a reduction in earnings per share and ownership position. When a convertible bond is exchanged for shares, new shares are created, increasing the total number of shares outstanding.

In this paper, we investigate the maturity structure of convertible bonds and its connection to the corporate debt overhang problem. To achieve this objective, we employ a framework reminiscent of Diamond and He (2014), integrating dynamic corporate investment into our model. Diverging from Diamond and He's model, which centers on finite-term straight debt, ...
