

Energy Storage. Electricity storage in the Czech Republic is available from pumped hydro storage plants, which have a significant amount of installed capacity, namely 1.18 GW. It is regarded in law and regulation as a special type of power source, as the term "electricity storage" is not yet recognized in the current Czech Energy Act.

>Inclusion of Energy Storage into the Energy Act, including the establishment of new business activity in the energy sector with its own special license >Usage of energy storage as an element of flexibility, development of RES, e-mobility, aggregation and others >Enable stand-alone batteries to become a common part of the grid and remove

The goal of the Association for Energy Storage (AKU-BAT CZ) is to promote favourable conditions for the development of all types of energy storage (batteries, hydrogen, Power 2 gas, Power 2 heat etc.); As the very first association of its kind in the region of Central and Eastern Europe, AKU-BAT CZ was created in response to the current boom in the development of renewable ...
