

What is xbatt DG series battery?

By using strong grids, high purity lead, and patented GEL electrolyte, the DG series offers excellent recovery after deep discharge under frequent cyclic discharge use, and the cycle life is more than 400 times at 100% DOD discharge. Xbatt Gel series battery is manufactured with special separator and colloidal or foamed silica.

What is xbatt DG?

Xbatt DG (Deep cycle gel) series is a pure GEL battery with 15~20 years of floating design life, it is ideal for standby or frequent cyclic discharge applications in extreme environments. The proven silica gel technology improves battery cycle life and performance at cold ambient temperatures.

What is xbatt gel series battery?

Xbatt Gel series battery is manufactured with special separator and colloidal or foamed silica. The batteries use silica gel to immobilize the electrolyte inside the battery. Features: 1. the battery electrolyte of the Xbatt colloid system is in gel state, without flow and leakage, and can be placed vertically or horizontally.
