

NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. When built, the facility will be able to hold up to 100 megawatts (MW) and power over tens of thousands of households. Once completed, the project will be amongst the ...

About the East River Energy Storage Project. In fact, the East River Energy Storage Project could begin operations in 2023. Besides, it is the largest battery energy storage project in the late stages of development in New York State under contract with a utility. Moreover, 174 Power Global expects the East River Battery Energy Storage Project ...

The project received funding from the Australian Renewable Energy Agency (ARENA) as part of ARENA's Advancing Renewables Program. To learn more, visit ARENA.GOV In December 2023 Silver City was awarded both a Network Service Agreement with Transgrid, and a Long-Term Energy Service Agreement (LTESA) from AEMO Services under the New South Wales ...

We construct, own and operate large-scale battery storage projects today that will transition us to the grid of tomorrow, with a growing portfolio of over 9,000 MW of battery storage projects in various stages of development across the United States - poised to double the nation's storage capacity in the coming years.

Sierra Estrella holds up to 250 MW / 1,000 MWh of battery energy capacity, supporting grid reliability and facilitating the integration of low-cost, readily available renewable energy into the local electrical system for Salt River Project. Construction of the Sierra Estrella facility started in summer 2023. The project came online in June 2024.

Working with local people, we're continuing to grow millions of trees to provide food and incomes and restore the river and land. The trees we plant mean stability and protection for the people living along the river. The roots stabilise the soil and prevent nutritious topsoil from being washed away in floods. They also help improve the land's fertility so that other crops can grow and ...

The privately held renewable energy developer rPlus Energies' Green River Energy Center project, a solar-plus-storage facility in Utah, has revised its PPA with PacifiCorp to quadruple the battery storage capacity from 400 MWh to 1,600 MWh.. The project, with a capital investment of more than \$1 billion and a combined solar and storage capacity of 800 MW, will ...
