

Envision Energy has launched a advanced 5 MWh containerized liquid-cooled battery energy storage system (BESS). The system not only enhances Envision's energy storage product lineup but also sets new benchmarks for safety and performance in the industry, the company claims.

Energy storage is truly unique in its ability to add flexibility and efficiency to our nation's power grid. Battery energy storage systems (BESS) are great neighbors. Storage's unique capabilities serve communities in safe, clean, efficient, and affordable ways. Storage provides reliability during historic adverse weather events, serving as ...

The Energy Storage Global Conference (ESGC) is back! The conference's fifth edition will be held on 11 - 13 October 2022 and is organised by EASE - The European Association for Storage of Energy, with the support of the European Commission's Joint Research Centre, as a 100% hybrid event at Hotel Le Plaza in Brussels, as well as online.

Join the 3rd China International Energy Storage Expo (EESA EXPO) from September 2-4, 2024, at the National Exhibition and Convention Center in Shanghai. Organized by the Electrical Energy Storage Alliance (EESA), this premier event is Asia's leading exhibition for the energy storage industry.

At EESA China International Energy Storage Expo (EESA EXPO), Asia's premier energy storage exhibition, the road ahead is paved with countless opportunities. From connecting with 150,000+ of your peers to doing business with 600+ exhibitors, It's an exhibition that yields benefits throughout the entire year.

EESA predicts that household energy storage installations in major global countries will surpass 12GWh in 2023. In 2022, new installations in the global household energy storage market reached 7.38GWh, with CR5 countries (Germany, Italy, Japan, the U.S., and Australia) constituting 75.6% of the total.

EESA Chairman, Du Xiaotian, delivered a comprehensive summary of the global and Chinese energy storage industry's developments in 2023, unveiling shipment data and rankings across various segments of the energy storage landscape. According to EESA statistics, global installations of new energy storage systems reached 47.1 GW/103.5 GWh in 2023 ...
