

# Electricity storage bay window design

According to URA, a bay window is a window that is raised at least 0.5m from the floor. You may often spot a concrete ledge below the window itself, which can be turned into storage or for decorative means. While bay windows overseas often protrude out of the profile of the house, it's rare to find such ones locally.

More glass panels expose a larger surface area to external temperatures, which could slightly reduce energy efficiency. However, modern bay windows have advanced glazing options to mitigate this, ensuring they remain energy-efficient. Bay Windows: Pros And Cons.
