Are gangs blocking fuel shipments in Haiti?

Gangs are blocking fuel shipments- gangs that have become increasingly powerful in Haiti,filling the power vacuum created by all that recent turmoil. Everything from hospitals to cellphone towers are running out of gas. Linda Thelemaque is country director of the nonprofit Hope for Haiti. That's an aid organization.

Why is Haiti facing a fuel shortage?

Haiti is currently experiencing a severe fuel shortage due to the fact that powerful gangs have seized control of much of the fuel distribution around the country. The crisis comes in the wake of President Jovenel Moise's assassination earlier this year and the country's ongoing economic and political instability.

Did a fuel tanker explode in Haiti?

A fuel tanker exploded in northern Haiti,according to reports,resulting in the death of more than 60 people. The incident occurred in the city of Cap-Haïtien, and victims were trying to gather leaking fuel when it ignited. Local hospitals have been overwhelmed by those injured in the blast.

Did illegal fuel storage cause a fire in Port-de-Paix?

PORT-DE-PAIX -- Two people have died in a third fire caused by the illegal storage of fuel in a Port-de-Paix locality, Le Nouvelliste reported, bringing to three the number of fatal fires involving fuel seen in Haiti in four days. Among the dead from the Dec. 14 fire in Delmas are an older woman and a baby. Their names have not yet been released.

Why is Haiti struggling to modernise its energy sector?

Haiti's recent battles to modernise its energy sector serve as a stark lesson for how fraught the business of energy transition can be. In the wake of the scandal, the struggle to provide Haiti's 11 million people with reliable energy - and the desire to attract foreign investment to do so - has taken on an evermore politically charged hue.

How long does a power outage last in Haiti?

Power outages in some areas of the country can last for weeks, while in neighbourhoods near Haiti's National Palace in downtown Port-au-Prince - always politically restive - jerry-rigged siphoning of current has gone on for decades as successive governments dare not act against it.

LG Energy Solution's Seungse Chang told Energy-Storage.news that on a basic level, no large-scale BESS projects can pass AHJs requirements without meeting the key UL9540 certification or going through UL9540A fire testing. In most cases, National Fire Protection Association code NFPA855, which incorporates these, is needed.

its type involving Tesla Megapacks. Image: Country Fire Authority. A fire has taken place at a 50MW/100MWh grid-scale battery storage project in Queensland, Australia, as it reached the final stages of its commissioning phase.

Fire incidents at energy storage facilities are extremely rare and remain isolated. In fact, there has been less than 20 incidents at operating energy storage facilities in the U.S. in the last decade. Nonetheless, the industry is continuous in its proactive approach to work with policymakers and fire officials to promote safety and ensure that ...

One fire expert told Energy-Storage.news earlier this year that although fire safety is and should remain of utmost importance, often the general public and even academics unconnected with the industry are unaware that, for example, failures in large-scale energy storage are unlikely to cause the sort of explosive events that one high profile ...

Energy storage and fire risks: Understanding BESS safety. For over a century, battery technology has advanced, enabling energy storage to power homes, buildings, and factories and support the grid. The capability to supply this energy is accomplished through Battery Energy Storage Systems (BESS), which utilize lithium-ion and lead acid ...

The Stat-X Advantage for Fire Suppression for Energy Storage Systems. Preserve the core of your business operations by safeguarding crucial assets from potential hazards. Keep your operations running seamlessly by significantly reducing disruptions and costly halts caused by fire incidents.

most energy storage in the world joined in the effort and gave EPRI access to their energy storage sites and design data as well as safety procedures and guides. In 2020 and 2021, eight BESS installations were evaluated for fire protection and hazard mitigation using the ESIC Reference HMA. Figure 1 - EPRI energy storage safety research timeline
