They are quick and easy to install and come with automatic configuration features. There are two types of ZCS storage solutions: retrofit and hybrid. ... PV production, energy stored and exchanges with the grid.

The main difference with energy storage inverters is that they are capable of two-way power conversion - from DC to AC, and vice versa. It's this switch between currents that enables energy storage inverters to store energy, as the name implies. In a regular PV inverter system, any excess power that you do not consume is fed back to the grid.
