

What is a Fiamm FLB battery?

FIAMM is a leading global manufacturer of industrial batteries and offers a wide selection of products designed to ensure a continuous power supply for a variety of applications. The FLB is one of FIAMM's most popular batteries and is utilised in a variety of applications, such as UPS backup power.

What is a FLB battery?

The exterior construction uses a Flame retardant ABS plastic to UL94 V0 - this guarantees a high level of safety and superior thermal stability to avoid case bulging. The FLB range is based on AGM VRLA technology and it is 99% recyclable at the end of life. The battery is fully maintenance-free and requires no routine topping-up of the electrolyte.

What are Fiamm Highlite batteries?

FIAMM HIGHLITE batteries are Valve Regulated Maintenance Free types with the electrolyte absorbed in microporous glass fiber separators. HIGHLITE batteries can be installed in cabinets or on racks and minimum installation space is required due to the high energy density characteristics of this range.

Can Fiamm energy technology change or revise this publication?

FIAMM Energy Technology reserves the right to change or revise without notice any information or detail given in this publication.

What makes Fiamm standby batteries unique?

FIAMM operates a program of continuous improvement investing in manufacturing processes, equipment and technology. FIAMM's Standby Battery manufacture conforms to ISO 9001 and ISO 14001 quality assurance. Our continuous investment in battery technology is reflected by means of premium products that are of the highest quality and reliability.
