

# FS Steel Solar PV Ground Mounting Plants Zinc Coated Rack

What is the SunTurf-TT ground mount system?

The SunTurf-TT ground mount system incorporates SunModo's SMR technology and its patented module clamps and bonding system. The SunTurf-TT uses 2" and 2-1/2" schedule 40 steel pipes for its vertical and horizontal structure, which are joined together using an innovative adjustable pipe clamp design.

Which steel is best for PV mounting?

To do so, it requires a robust supporting structure made from high-quality steel with effective corrosion protection. With ZM Ecoprotect &#174; Solar, thyssenkrupp Steelnow offering high-performance, zinc-magnesium-coated steels for PV mounting systems - durable, robust and sustainable.

What is the best corrosion protection for solar mounting structures?

Your contacts when it comes to high-performance corrosion protection for solar mounting structures: Arne Schreiber, Product Management and Jennifer Schulz, Surface Development. ZM Ecoprotect &#174; Solar offers several advantages compared to pure zinc coatings.

What is a FS System?

Fully integrated and modular components The FS System is capable of accommodating nearly any framed or frameless PV module currently on the market. Each FS System is custom designed to meet specific structural load requirements. Included in the FS System are clamps (Rapid2+™ Grounding Clamp) specifically designed to secure

How do you install a FS System?

FS System form an electrically bonded unit. While individual components and structural sections will vary between designs, the primary assemblies and installation methods will remain the same. During installation do not secure bolts to the final torque until the system is fully assembled. The following is a guide to properly install an FS System

Why should you buy a sunfolding T29 solar tracker?

The Sunfolding T29 also makes solar plants faster to install and easier to operate. Sunfolding has won recognition as a 2020 Global Cleantech 100 Company and a 2019 Bloomberg New Energy Pioneer. Headquartered in Alameda, CA, Sunfolding ships US-manufactured trackers throughout North America.

The structures are made of high-quality structural steel with a zinc coating of 20 to 120 microns, according to ISO 1461: 2009 and customer specifications. It is possible to manufacture structures for PV modules from 1 to 3 rows in a ...
