Above-ground cable management for solar farms and facilities is becoming more prevalent both in the U.S. and across the globe, with innovative new cable management systems making installation and management far easier and more cost-effective.

Our American-made ground mount solar rack system is versatile, easy to install, and a fraction of the cost of competing brands. Prices will vary based on the # of solar panels you have / need. You can pick from our pre-determined rack system sizes here, or reach out if you need a ground mount solar rack system for a specific number of solar panels.

Energy Independence Matters Now, More Than Ever. Solar has become much more affordable. The Solar Energy Industries Association (SEIA), the national trade association for the U.S. solar industry, has seen a 53% fall in the price of solar over the last 10 years. They anticipate that as the Texas economy continues to grow, electricity consumption will correspondingly increase.

Solution. Robust solar foundations and racking systems Site Survey and Testing. Conducting a site survey and ground screw testing ensured the site location was feasible for the project, with ground screw foundations to be installed to the required depths to provide the tensile capacities and support for the solar array and withstand significant horizontal and vertical uplift forces.
