

What is a novotegra flat roof system?

The solutions enable installation with both south and east-west orientation of the PV systems. novotegra flat roof systems offer optimal mounting solutions for PV systems on flat roofs with all surfaces, including concrete roofs, foil roofs, bitumen roofs and gravel roofs.

What pitch can a novotegra flat roof be used for?

The complete novotegra flat roof portfolio can be used for roof pitches up to 5°. The module pitch is possible up to 13°, so that the available area on the flat roof can be used efficiently. Simple logistics and quick installation. The installation of novotegra flat roof solutions is as uncomplicated as can be.

Do novotegra flat roof mounting systems have a T&V and CE certificate?

Of course, all novotegra flat roof mounting systems have the required T&V and CE certificates. The mounting systems are designed to withstand all weather conditions and thus guarantee a long service life. A product guarantee of 12 years gives the operator of the PV system additional security. For flat roofs always the right decision

What are PV substructures for flat roofs from novotegra?

The PV substructures for flat roofs from novotegra are characterised by their high degree of flexibility.

Why should you choose a flat roof III?

With our Flat roof III, we enable even easier and faster assembly thanks to the high degree of prefabrication and the tool-free click system. The short components allow easy handling as well as low logistical effort, as they require little space and can also be transported in small vehicles.
