

Corab PB-062 system is an aerodynamic photovoltaic construction dedicated for flat roofs. Modules orientation is East-West and slope angle is 10 degrees. It is made of high-quality aluminum. It is a weight system and has dedicated ballast platforms. It is equipped with additional insulation protecting roof against friction of aluminum elements.

Corab PB-064B system is a ballast structure for flat roofs. Slope angle is 10 degrees. Made of high quality aluminum and stainless steel. Modules orientation is dedicated to south-oriented installations. Additional elements include a wind brace and insulation protecting roof against damage. In this system, the ballast blocks are hidden under ...
