

Flooded Tubular OPzS Series

What is a BAe OPzS series flooded tubular plate cell?

1. Application The BAE OPzS Series flooded tubular plate cells are one of the most enduring lead acid batteries on the market today. They are ideally suited for stand-by operations as well as for capacitive loads. They perfectly meet requirements for bridging times between 1h to more than 10h. 2. Types, capacities, dimensions, weights

What is a powersafe OPzS battery?

PowerSafe OPzS batteries feature tubular plate technology that offers excellent cycling performance together with a proven long life under float voltage conditions. The pasted negative flat plate design provides the perfect balance for maximum performance across a wide capacity range.

What is a flooded tubular battery?

LEOCH® OPzS Series, Flooded Tubular batteries have been specifically engineered for critical standby applications, offering a wide operating temperature of -4°F to 131°F (-20°C to 55°C) and long design life of 20 years.

What is sunlight OPzS?

Sunlight OPzS is a reliable backup power source, safeguarding the uninterrupted supply of energy and connectivity that our modern world needs. Learn more about this advanced lead-acid battery series for energy storage systems.

Why should you choose OPzS?

Optimum design, according to DIN international standards, exclusive use of high quality raw materials, robust construction and state of the art manufacturing processes make this OPzS range the ideal solution for stand-by applications requiring high level of safety and reliability.

Discover® Energy Storage Flooded OPzS Tubular batteries provide long and reliable performance in reserve power applications. The batteries have a long proven track record in mission-critical installations, especially in remote and ...
