

GS-Ground Fixed Mounting System Grace Solar

What is a fixed tilt solar mounting system?

The self-developed aluminum alloy fixed mounting system, due to its high quality, durability and standardized product advantages, aluminum alloy's unique quick installation structure and flexible layout style have become the most widely used solution in the construction of PV power plants. See details Ground fixed tilt solar mounting system

Who is Grace solar?

Grace Solar is a manufacturer of ground mounting system, PV mounting system, Ground mount solar system, ground solar PV support. If you want to know the price of Ground solar bracket, Ground mount solar system, Ground solar photovoltaic support, please contact us. Solar Ground Mounting System-PV Mounting System-Ground Solar PV Support, Home

What is a carbon steel fixed mounting system?

The self-developed carbon steel fixed mounting system has become the most widely used solution in the construction of PV power plants due to its high quality, durability and standardized product advantages, rapid installation structure and flexible layout style. It is applicable to all power plant projects.

What is GS-smart flexible mounting solution?

It is applicable to all power plant projects. GS-Smart Flexible mounting solution is an architectural form that fix solar modules between the buildings. It has significant advantages when applied in large span areas, such as rivers, sewage treatment plants, orchard nursery and other areas where continuous pile posts cannot be placed.

What certifications does Grace solar have?

Grace Solar products have passed certifications in many countries and regions around the world, including UL, TUV, CE, JIS, MCS, AS/NZS1170 certification, Also new Wind Tunnel Test Report, as well as bank ability report for our GS-light Tracker, Establish long-term and stable strategic partnerships with many Top 500 companies globally.

What is Grace solar double pillar bracket?

Grace Solar double-pillar bracket is suitable for large-scale ground power plants in various terrains. It adopts open carbon steel cross section as support. With pile driving equipment, the installation speed can be increased by 50% compared with that of screw bolt, and the installation steps of foundation
