

# Ground Ramming Pile Mounting System

## Single Column Kinsend Metal

What is solar ground ramming pile mounting system?

Solar ground ramming pile mounting system is applied to residential, commercial and utility scale PV projects on non-sandy ground. It suits both framed or frameless solar panel installations, especially on uneven terrain. It works for level ground too.

How does a solar ground mounting system work?

Solar ground mounting system is typically applied on flat open field ground. The concrete base is easy to build regardless of various soil conditions. The Solar Ground Pile Mounting System uses Pile drivers to drive C-beams, H-beams or other structural steel directly into the Ground. Installation is simple.

What is ground mounting system?

Ground mounting system is made of aluminum to mount on concrete foundation or ground screws, Quick installation with large-scale ground photovoltaic system power station construction progress.

What is a PV ground mounting system?

This type of installation is widely used in many soil plots. The main material of the PV ground mounting system is high-purity aluminum alloy, which is light in weight, pre-assembled components are simple structural design, effectively reducing the onsite cost. The support surface is anodized, with high corrosion resistance.
