We propose to characterize a "business model" for storage by three parameters: the application of a storage facility, the market role of a potential investor, and the revenue stream obtained from its operation (Massa et al., 2017). An application represents the activity that an energy storage facility would perform to address a particular need for storing ...

Battery capacity measures how much energy, in amp-hours (Ah), a battery can supply. It is how much energy can be stored and drawn from it. A battery rated 150Ah can give a current of 1A for 150 hours or 5A for 30 hours. A batteries capacity is a factor of the rate at which current is drawn from it. The faster the rate, the lower the capacity.
