

# Hybrid Inverter 5-10KW iYPower

What is a hybrid inverter?

Hybrid inverters are essentially two inverters in one; they combine a solar inverter and a battery inverter into one simple unit. These advanced inverters use solar energy to power your home, charge a battery or send excess energy into the electricity grid. Most hybrid inverters can also provide emergency backup power during a blackout.

What are the best hybrid inverters?

Sungrow SH-RS series are our favourite hybrid inverters due to their numerous features, wide variety of sizes, high backup power rating, simple design and affordability. The SH-RS series is available from 3.0kW to 10kW and features 200% solar oversizing, a digital display, instantaneous backup power, and high efficiency.

What is a Deye hybrid inverter?

Deye hybrid inverters, produced by Ningbo Deye Inverter Technology Co., have become popular for backup and off-grid applications due to their high power rating, dual AC inputs, and built-in backup generator controls.

Can a hybrid inverter power an off-grid home?

In general, most hybrid inverters are not suitable for providing continuous power to an off-grid home. This is primarily due to their limited surge power rating and inability to manage and control backup power sources like generators effectively.

Can a hybrid inverter run a whole house backup?

Most hybrid inverters also have limited pass-through power capability, so only essential loads like lighting and backup appliances can be powered in backup mode. Whole house backup generally requires a more powerful hybrid/off-grid inverter.

Do hybrid inverters provide emergency backup power during a blackout?

Most hybrid inverters can also provide emergency backup power during a blackout. Hybrid inverters for residential use are available from 3kW up to 15kW in single or 3-phase varieties with various intelligent control features.
