Solar Working Station,Lighting Controller,Charger Controller,Solar System Controller,Voltage Controller. Model Number. ICharger-4860.

Easun icharger mppt 6048 I'm looking to buy this solar charge controller, and i want to use it on a 24v lifepo4 battery, now i've seen in its description that it only supports 1440w max from pv and i was wondering what would happen if i connect more panels, with a total of 2600w, respecting the controller's voltage range.
