

The energy crisis and environmental pollution drive more attention to the development and utilization of renewable energy. Considering the capricious nature of renewable energy resource, it has difficulty supplying electricity directly to consumers stably and efficiently, which calls for energy storage systems to collect energy and release electricity at peak ...

Global energy storage developer Eku Energy has signed a Framework Agreement with Renera Energy, a European consulting, trading and development group. The agreement, signed on 28th June 2023, secures Eku Energy exclusivity over 1GW of battery storage projects in Italy.

Enel is active in BESS globally, with a portfolio that includes the Azure Sky solar and storage project in Texas (pictured). Image: Enel Green Power . Utility and IPP Enel has sold a 49% stake in its subsidiary that will own and operate 1.7GW of battery energy storage system (BESS) projects in Italy, to investor Sosteneo.

Increasing research interest has been attracted to develop the next-generation energy storage device as the substitution of lithium-ion batteries (LIBs), considering the potential safety issue and the resource deficiency [1], [2], [3] particular, aqueous rechargeable zinc-ion batteries (ZIBs) are becoming one of the most promising alternatives owing to their reliable ...

It is important to mention that in each new version of the CE, the FiT were decreased. Since CE 1 was first issued in 2005, the basic support level has been curtailed from approximately 0.45 EUR/kWh in 2006 to 0.20 EUR/kWh in 2012. 5 Besides a reduction in tax revenues due to cuts in the PV purchase tax and the expenses associated with administrative tasks, the ...

Developers Eku Energy and Renera Energy have signed an agreement to deploy 1GW of battery storage projects in Italy, the latest in a flurry of companies entering the market. Eku Energy signed the framework agreement with Renera at the end of June, and it secured exclusivity over 1GW of battery storage projects in Italy.

PNIEC envisages the 2030 energy storage scenario to consist of 8 GW of hydroelectric pumping systems (most of which are already in place), 4GW of distributed energy storage systems (i.e. smaller scale storage systems integrated with residential, mostly photovoltaic plants - many of these distributed energy storage systems are also already in ...
