

Italy energy storage project subsidy policy

What is the EU state aid scheme for energy storage in Italy?

The European Union (EU) Commission has approved a state aid scheme aiming to fund the rollout of over 9GW/71GWh of energy storage in Italy. The scheme totalling EUR17.7 billion (US\$19.5 billion) will provide annual payments covering investment and operating costs for those developing, building and operating large-scale energy storage in Italy.

Will Italy support a centralized electricity storage system?

The European Commission has approved, under the European Union's state aid rules, a EUR 17.7 billion scheme with which Italy intends to support the establishment and operation of a centralized electricity storage system.

How will Italy's electricity storage subsidies work?

After winning clearance in Brussels, Italy can now select companies developing electricity storage projects eligible for subsidies. The mechanism is set to cover investment and operating costs through annual payments.

Does Italy need 9gw/71gwh of energy storage?

Italy's TSO Terna says it needs 9GW/71GWh of energy storage by integrate its renewables pipeline. Image: Terna. The European Union (EU) Commission has approved a state aid scheme aiming to fund the rollout of over 9GW/71GWh of energy storage in Italy.

What is Italy's state aid scheme?

REUTERS/Yara Nardi/File Photo Purchase Licensing Rights BRUSSELS, Dec 21 (Reuters) - The European Commission on Thursday said it had approved a 17.7 billion-euro (\$19.4 billion) Italian state aid scheme to support the development of a centralised system to store electricity from renewable sources.

How will Italy support the green transition & reduce fuel dependencies?

On 20 November 2023, to support measures in sectors which are key to accelerate the green transition and reduce fuel dependencies. The Italian measure Italy notified to the Commission, under the Temporary Crisis and Transition Framework, a EUR1.1 billion scheme to support

Italy's National Energy and Climate Plan (NECP) includes specific targets for storage technologies Italy's storage targets Italy's target for the share of renewable electricity by 2030 55% Utility-scale 3-4 GW Customer-sited 4.5 GW Italy's NECP targets between 7.5 GW and 8.5 GW of energy storage by 2030, of which 4.5 GW is expected

The early growth of energy storage in Italy was mainly due to the high subsidy (110%) for household storage, which slowed down as tax credits gradually faded and credit transfer was blocked. ... only 120MW of the

2.1GW of energy storage projects awarded through capacity auctions were operational, while only 122MW of the 230MW of energy storage ...

Energy storage systems play a crucial role in Italy's decarbonisation and energy security. On 21 January 2020, the Ministry of Economic Development published the Integrated National Energy and Climate Plan, setting targets for energy efficiency, development of renewable sources, and CO2 emissions reduction.

Energy storage hit another record year in 2022, adding 16 gigawatts/35 gigawatt-hours of capacity, up 68% from 2021. Beyond record additions, several markets announced ambitious energy storage targets totaling more than 130GW by 2030, although BloombergNEF remains cautious on its impact on forecast demand given the lack of policy ...

In the context of China's new power system, various regions have implemented policies mandating the integration of new energy sources with energy storage, while also introducing subsidies to alleviate project cost pressures. Currently, there is a lack of subsidy analysis for photovoltaic energy storage integration projects. In order to systematically assess ...

The Energy Storage Market in Germany FACT SHEET ISSUE 2019 Energy storage systems are an integral part of Germany's Energiewende ('Energy Transition') project. While the demand for energy storage is growing across Europe, Germany remains the European lead target market and the first choice for companies seeking to enter this fast-developing ...

Currently, lithium-ion battery technology is an area of focus in Spain. In fact, Red Eléctrica de España, the system operator, is currently running a project (Project Almacena), which basically consists of field installation of a system of energy storage with a lithium-ion battery with a power of about 1 MW and a capacity of at least 3 MWh, with the purpose of evaluating the ...
