

To date, Energy Vault's G-VAULT product suite has focused primarily on the Company's EVx platform, originally grid-connected (5 MW) and tested in Switzerland, which features a scalable and modular architecture that can scale to multi-GW-hour storage capacity. The EVx is currently being developed and deployed via license agreements in China (3.7 GWh ...

Laos" debt servicing payments will also likely rise to \$1.1 billion this year, exceeding the country's foreign reserves, which stood at \$864 million in June. A Lao Finance Ministry official told RFA's Lao Service that the country had built up debt building dams and other big-ticket infrastructure projects.

Vietnam Electricity (EVN) has received proposals from seven wind farm investors in Laos that want to sell electricity to Vietnam, with a total capacity of nearly 4,150 MW, the Ministry of Industry and Trade (MoIT) has said. An operational wind power plant

This will enable Laos to generate revenue from clean energy within three years, alleviate its dependency on crude oil imports, facilitate the development of energy storage and EV solutions, and achieve its national goal of being the "Battery of Asia".

In terms of primary energy demand, 80% of the demand is met by renewable energy sources and 20% by non renewable energy sources. The renewable energy sources include biomass (68% of the total demand), hydro (12% of the total demand). The non-renewable energy sources include oil (17% of total demand) and coal (3% of the total demand).

Energy is the cornerstone of the development of human civilization and the driving force of social progress. With the rapid development of the global economy, social energy consumption shows an upward trend [1, 2], in while the building sector is a major consumer of energy, accounting for about 30 %-40 % [3]. Moreover, along with the rising population and the ...
