What is a 6Ah Lithium LiFePO4 battery?

A 6Ah Lithium LiFePO4 battery is about equivalent to a 7Ah lead acid battery. It comes with a battery management system (BMS) with chip and cell balancing to extend its lifetime. Lithium 6Ah batteries are safe, reliable, and maintenance free.

What is a 12V LiFePO4 battery?

Most 12V LiFePO4 batteries are designed as a replacement for a car/truck/boat/RV battery and in particular, EXACTLY to be charged by an ordinary car alternator that is limited at 14.2-14.6 volt. (In contrast, PV/wind/offgrid installations are usually made from single 3.2V cells with external BMS)

Why should you choose a LiFePO4 battery?

The hardened ABS plastic external casing provides extra protection against spills and leaks. With a built-in BMS (Battery Management System), our LiFePO4 battery is protected from overcharging, over-discharging, over-current, short-circuiting, and high-temperature cutoff, ensuring maximum safety and reliability.

How does the BMS protect the Goldenmate LiFePO4 battery?

The built-in BMS protects the Goldenmate LiFePO4 battery from risks like overcharging, over-discharge, over-current, overheating, and short-circuiting. It also features a high self-discharge rate that can maintain the battery's charge for up to one year of maintenance-free storage.
