

How long does a LiFePO4 battery last?

A 100ah LiFePO4 battery will last for approximately 3-4 hours. How good are LiFePO4 batteries? There is no definitive answer to this question as it depends on a number of factors, including the specific battery model and manufacturer.

Are LiFePO4 batteries better than lithium ion batteries?

There is no definitive answer to this question as it depends on the specific application and requirements. However, in general, LiFePO4 batteries tend to offer several advantages over lithium ion batteries, including higher energy density, longer life span, and greater stability. How long will a 100ah LiFePO4 battery last?

How deep can LiFePO4 batteries be discharged?

When we do need to lean on the batteries for a few days at sea, the 80% depth of discharge (DoD) of these batteries is a valuable spec. LiFePO4 batteries can be discharged up to 80% of their capacity without damaging the battery or shortening its life.

How does renogy's LiFePO4 battery work?

Renogy has given their LiFePO4 batteries an energy-saving mode which it switches to if not charged or discharged for 24 hours. When in this mode, the battery will only lose 3% per month - meaning you'll have more power available when you're ready to put it back into use.
