The lithium chemistry of these batteries are generally about 1/3rd the weight of traditional lead-acid batteries while still providing a massive boost to performance and capacity so you won't miss a single second of runtime. On average, one LiFePO4 Battery, can go through upwards of >2500 cycles while a Lead-Acid Battery can only do about 200-300.

If you're looking for a battery that can provide long-lasting, reliable power, then a LiFePO4 battery may be the right choice for you. These batteries are increasingly becoming popular due to their many benefits, including their high energy density and low self-discharge rate. However, before making a purchase, it's important to understand both the advantages and disadvantages of ...
