

What is a goodwe lynx C series battery?

GoodWe's Lynx C Series is a high-voltage battery with capacities ranging from 101 kWh to 156 kWh. Compatible with GoodWe inverters such as BTC and ETC Series, Lynx C Series provides comprehensive energy storage options to meet project requirements for commercial and industrial scale applications.

What is lynx C?

Lynx C combines with GoodWe hybrid inverter ETC Series and retrofit battery inverter BTC Series to form a highly-flexible energy storage system that helps manage energy use for maximized self-consumption and ensures a reliable power supply for business.

What is a lynx C 60kWh battery system?

GoodWe's Lynx C 60kWh outdoor battery system is tailored for small to medium-sized commercial and industrial (C&I) energy storage applications. Its modular design not only minimizes the impact of local failures but also allows for swift and straightforward module replacements.

Why should you choose a lynx C battery system?

Lower electricity cost, reduced peak demand. Combined with GoodWe commercial storage inverters, the HV battery system Lynx C enables a high degree of self-consumption. Supported by powerful inverter backup capabilities, unbalanced power output and peak-shaving, the C&I storage system facilitates lower cost while ensuring uninterrupted power.

What is a lynx C series battery?

Furthermore, the reliable lithium iron phosphate (LFP) battery cell technology ensures maximum safety and a longer life cycle. No. 90 Zijin Rd., New District, Suzhou, 215011, China. GoodWe's Lynx C Series is a high-voltage battery with capacities ranging from 101 kWh to 156 kWh.

Why should you choose lynx C series?

The design and moderate size of the Lynx C Series allows for easier transportation and faster installation, and also automatically identifies PV module series for faster system commissioning. In addition, insulation resistance testing is supported to prevent electrical shocks, ensuring greater safety and reducing or eliminating down time.
