

MRac Floating PV Mounting System G4N

Why should you choose MRAC g4n+ floating solar PV system?

The MRac G4N+floating solar PV system,equipped with particularly designed floater of high density polyethylene (HDPE),is free of corrosion and environmental friendly. HDPE has very good resistance to UV radiation of sunshine and anti-aging properties and this ensures the durability of its 25 years of lifetime.

What is mibet g4n+ floating solar mounting system?

MRac Floating Solar Mounting System G4N+ Details The Mibet G4N+ floating solar mounting system features a meticulously conceived floating bridge design and utilizes HDPE material.

What is MRAC g4n+?

The launching of MRac G4N+system by Mibet provides a cost competitive solution for floating PV support which will make Mibet take lead in this promising area. As the development of solar PV plants, land for installation is becoming rare and expensive, thus solar PV is moving from land to water, just like what is happening...

What is MRAC g4n+ floating support system?

The MRac G4N+floating support system,equipped with particularly designed floater of high density polyethylene(HDPE),is free of corrosion and environmental friendly. HDPE has very good resistance to UV radiation of sunshine and anti-aging properties and this ensures the durability of its 25 years of lifetime.

What is the g4n+ floating solar mounting system made of?

The floating solar mounting system G4N+ is made of high-density polyethylene (HDPE) material, which meets the test standards of the Hunt water absorption test (CN), is anti-aging and UV resistant, and can withstand tensile forces far beyond other similar products.

What is mibet MRAC g4n+ floating system?

The entire Mibet's MRac G4N+ floating system has successfully solved existed technical problems and concerns of floating support and brings out cost saving for investors to achieve lowest LCOE.

Ove rvie ?. MRac ??? PV ?????????? G4N ?????????????????????????????? pv ??????????????????? ???.
