

The DOER, in collaboration with a new Massachusetts Clean Energy Center, will study how to optimise deployment and utilisation of long-duration and multi-day energy storage systems; including the necessity, benefits and costs of requiring distribution companies to conduct joint competitive solicitations and procurements for energy storage systems.

Energy News Weekly A weekly look at the energy landscape for those interested in clean energy and how it plays into the fight against climate ... Massachusetts will be part of a planned microgrid project. ... Chinatown is finalizing plans for a system to provide solar power and backup energy storage to a 200-unit affordable housing apartment ...

Recognizing the key role energy storage must play in meeting our energy and climate goals and the ongoing challenges to its deployment and use, Section 80(a) of the 2022 Climate Act authorized DOER and the Massachusetts Clean Energy Center (MassCEC) to conduct a study ("the Study") to provide: An overview of the existing energy storage market in the ...

In May 2015, Governor Charlie Baker (R) introduced a conceptual Energy Storage Initiative (ESI) in Massachusetts to incentivize energy storage companies to do business in the state, accelerate early-stage commercial energy storage technologies, expand the market for these technologies, and develop policy recommendations to advance these goals.

The Long Duration Energy Storage Council is being formed by 24 technology companies, users and investors to achieve grid net-zero by 2040. This will see ~10% of all energy being stored in 8 hour+ storage technologies, requiring 85-140TWh of deployed capacity Glasgow, 04 November 2021 - The launch of the[...]

Rendering of Plus Power's Sierra Estrella Energy Storage project currently in development for utility SRP in Arizona. Image: SRP. Two large-scale battery energy storage system (BESS) projects in Massachusetts have been granted key approvals, ending a situation described as a regulatory "black hole" by one local news outlet.

The Governor launched the Energy Storage Initiative in May 2015, with the goal of advancing the energy storage segment of the Massachusetts clean energy industry by: Attracting, supporting and promoting storage companies in Massachusetts; Accelerating the development of early commercial storage technologies
