

Metal Roof Mounting System

What mounting systems are available for a metal roof?

Without continuous rails. Standing seam metal roofs Optimum mounting solutions for metal standing seam roofs for all types of profiles. Triangular elevated mounting system The universal triangular elevated mounting system for unlimited possibilities. Pitched roofs The universal pitched roof system, also for the metal roof.

What ancillaries can be mounted to a metal roof?

You can mount a variety of ancillaries, such as MLPE, wire trays, and junction boxes, to standing seam and exposed-fastened metal roofs using S-5! clamps and brackets, and the GRIPPERFIX[®]; universal utility mounting system. The S-5-PVKIT can be used to mount solar PV without traditional rails to standing seam and exposed-fastened metal roof profiles.

What is a rail-mounted roof system?

As demonstrated in Figure 1, a typical rail-mounted system utilizes aluminum or light-gauge coated steel rails mounted above the seams or ribs of a metal roof. Figure 1: Flush Rail Mounted (Photo courtesy of S-5!) This method normally orients the rails traversing the seams or ribs of the south-facing metal roof.

Should solar PV be mounted to metal roofing?

When mounting solar PV to metal roofing, essential criteria such as the method/engineering of attachment should be considered to provide permanence for building owners and ease of installation for solar contractors. Done the right way, the integrity of both the roof and solar PV system are preserved, and code compliance is maintained to achieve the

Is metal roofing a good option for rooftop solar?

Metal roofing has some attributes that are often overlooked as compared to alternative roof types. The metal roof provides an ideal platform for mounting rooftop solar for these primary three reasons:

What are the different types of metal roofing?

Main Types of Metal Roofs for Solar Mounting Standing seam metal roofing (also referred to as concealed fastener metal roofing) features various types of raised seams that run across the roof deck and hidden fasteners. This is the most durable type of metal roofing available.

The solar panel mounts on metal roofs consist of two basic parts: mounting clamps for roofs and solar panel attachments. You can choose either rail-based or rail-less installation, depending on various factors and personal preference.

Offering rail-based & rail-less solar racking systems and solar roof attachments for every type of roof, from EcoFasten. Skip to content. 877-859-3947 ... UL 2703. Designed by installers, for installers, these complete
