

Several decades ago, a highly infectious, constantly mutating micro-organism - capable of extinction-level destruction - was contained in a military facility. In the present day, the military has sealed the facility's lowest sublevel selling the remaining space to a self-storage company. As temperatures rise underground, the micro-organism finds a way to escape - and if left to ...

China has stated that it plans to increase the share of clean energy in its power generation mix from 42 per cent currently to over 50 per cent by 2025. This would require significant energy storage capacity to maintain grid stability. The NDRC intends to commission a study and develop a new energy storage development plan for 2021-2025.

The 2025 IEEE Energy Storage & Stationary Battery (ESSB) Committee Winter meeting and the 2025 Electrical Energy Storage Applications & Technology (EESAT) Conference are being held ...

ENERGY STORAGE COULD BE A GAME CHANGER FOR DEVELOPING COUNTRIES 14 Targets by 2030 7.1 Ensure universal access to affordable, reliable and modern energy services 7.2 Increase substantially the share of renewable energy in the global energy mix 7.A Enhance international cooperation to facilitate access to clean energy research and technology.

Developers plan to add another 15GW in 2024 and around 9GW in 2025. US battery storage has been growing since 2021 and could increase by 89% by the end of 2024 if developers bring all of the energy storage systems they have planned on line by their intended commercial operation dates, the EIA said. ... also released on January 9, LCP Delta said ...

Energy and climate-related policies have been accelerated by both state and federal governments, and for many companies the time feels right to invest in energy storage. This event gathers together investors, developers, IPPs, grid operators, policymakers, utilities, energy buyers, service providers, consultancies and technology providers under one roof.
