

What is OPzS battery?

OPzS series is a flooded Lead Acid battery that adopts Tubular Plate technology to offer high reliability and performance. The Battery is designed and manufactured according to DIN40736-2/IEC60896-11 standards and with die-casting positive spine and patent formula of active material.

What is OPzS series?

OPzS series exceeds DIN40736-2/IEC60896-11 standard values with more than 20 years floating design life at 25°C and is even more suitable for cyclic use (solar/wind energy, traction etc) under extreme operating conditions.

What is the final voltage of OPzV battery?

What are OPzV battery parameters & drawings?

Product Parameters and Drawings 3. Conductance, Internal Resistance and Short Circuit Current The OPzV battery's conductance and internal resistance decrease with the capacity 1. OPzV Battery Parameters increasing. They are dynamic parameters instead of linear ones and change with Dimension temperature, SOC (state of charge) and discharge state.

Where can I buy OPzS batteries in Nigeria?

Read about OPzS batteries here. Ritar has a range of lead carbon batteries. SolarKobo is an authorised dealer of Ritar batteries in Nigeria. Ritar batteries have been a trusted feature of our installations. They come highly recommended by other dealers too.
