Has a change been requested for this property within the last year?

Lack of effective government action is preventing the creation of a state policy in line with socio-economic development, while the conflict in Barro Blanco, the Hydroelectric moratorium in Chiriqui, and the suspension of wind and solar licenses, alarms investors. From a statement issued by the Chamber of Commerce, Industries and Agriculture of Panama ...

Panama has a storage capacity of 29.8 million barrels of oil, according to the latest report from the country's National Energy Secretariat. The Fuel Free Zone (ZLC by its initials in Spanish) Petroterminal de Panama occupies almost half of the total capacity, through its two tank estates: Charco Azul in Chiriqui, which has a capacity of 7.5 million barrels, and Chiriqui Gran

All sectors of Development Services can now be completed through the City directly. Digital software called Cloudpermit will be utilized for planning and zoning, building services, fire, environmental, code compliance and contractor registration services. ... The City of Panama City has incorporated drainage studies to its building code that ...

Energy infrastructure development in Panama, as in the rest of Latin America, was conceived under assumptions of climate stability, anticipating minimal or even no changes in climate behaviour over the long term. However, in the past decade, Panama's climate patterns have changed significantly (Ministerio de Ambiente Panama, 2021).
