

Polar Bear III HD 5 Degree PanelClaw

What racking system does panelclaw offer?

PanelClaw offers one racking system: the clawFR Platform. The clawFR Platform replaced the Polar Bear III HD, which was phased out in 2019. PanelClaw's most recent product, the clawFR platform, is designed to be easier and quicker to install than their classic racking product, the Polar Bear III HD.

Who is panelclaw solar racking?

In this article, learn about PanelClaw, a racking manufacturer specializing in flat-roof solar setups. Based in Andover, Massachusetts, PanelClaw is a flat roof solar racking provider with more than 1.75 gigawatts (GW) of solar projects deployed worldwide, spread over 10,000 individual projects.

How many kilowatts can a panel claw Solar System run?

They have completed solar installations ranging from 5 kilowatts (kW) to 20 megawatts (MW). Importantly, properties that are typically good candidates for PanelClaw's equipment are commercial buildings.

Can a clawfr panel be tilted at 10 degrees?

Panels can be single- or double-tilted at 10 degrees, and a 5-degree option is in the works. The system is available in ballast only, fully attached, or hybrid configurations. All clawFR configurations come with a 25-year product warranty.
