

# Power Kits LFP Battery

How many kWh is a 4000Wh LFP battery?

Forget Refueling? Featuring a 4000Wh LFP battery capacity,expandable to 48kWhwith extra batteries or smart generators,providing 2-4 days of whole-home backup power. With 7 unique and 18 combo charging methods like AC wall outlets,solar panels,gas generators,EV charging piles,or the EcoFlow smart home panel 2,you can forget fuel worries.

How long do LFP batteries last?

Power Kits LFP Batteries are designed to last for extended use in your RV with an off-grid build. Up to 4x longer than other battery chemistries such as NCM. To put a number to it,you can expect around 3000 cycles(each cycle is a full charge and discharge) to 80% capacity. They'll still work just fine after 3000 cycles.

How many LFP batteries can I use with ecoflow power hub?

You can select up to three LFP Batteriesto connect with the EcoFlow Power Hub. Either 1-3 2kWh batteries or 1-3 5kWh batteries. However,you cannot mix 2 and 5 kWh batteries in one setup. Can I use the LFP batteries in a cold environment? Yes. We designed Power Kits to operate in Tiny homes or RVs in cold environments too.

What is a power kit?

Unlike other RV power solutions, Power Kits combine five components into one Power Hub that deals with all your power needs, saving you space, money, and set-up hassle. Our 2 and 5kWh batteries securely stack in threes, giving you an expandable capacity of up to 15kWh.

Are power kits compatible with ecoflow smart home panels?

If you've got your own panels,they may be compatible with EcoFlow Power Kits. There's one caveat,though - each solar input port on the Power Hub only supports up to 150V,30A panels. So double check your panels fall on or under that. Are Power Kits compatible with the EcoFlow Smart Home Panel? Good news for you here. Yes.

How many cycles can a power kit charge?

To put a number to it,you can expect around 3000 cycles(each cycle is a full charge and discharge) to 80% capacity. They'll still work just fine after 3000 cycles. You'll just have 80% of the capacity you had when they were brand-new. What's the maximum charging input for Power Kits? You can charge your system with a max input of 6000W.
